

ABOUT ENAXY

We are Industrial Control Systems (ICS) technologists and former asset owners who have spent our careers protecting cyber physical assets. We believe that everyone should protect their assets and are stewards of assisting in that process.

ASSESS

Understand the current state of your Operational Technology/Industrial Control Systems (OT/ICS) security program to identify your strengths and opportunities to elevate your organizations security program.

STRATEGY

Once gaps have been identified and needs established, our team will develop clear, manageable additions to your security strategy and implement a process to move your organization forward.

DEPLOY

When it's time to put your security strategy in place, our experts will guide your teams through the selection and implementation of the right OT/ICS security tools and upgrades for optimum focus

ELEVATE

Enhance your organization's security program to ensure its success and achieve your goals.

ACT

Investigate and respond to cyber security events and incidents when they are identified.

If you are frustrated at wasted time and resources spent on security projects with nothing to show for it or need your security or operations team to do more with less, give us a call at **(469) 574-4000** or send a message to **info@enaxy.com**
