PROTECTING CYBER-PHYSICAL SYSTEMS

Six OT cybersecurity solutions for industrial operations, from strategy through recovery.

ABOUT ENAXY

Enaxy was founded by Industrial Automation and Control Systems technologists and former asset owners. We help operations, IT, and security leaders understand OT risk, prioritize improvements, and protect cyber-physical systems without disrupting the work that keeps the business running.

SIX SOLUTIONS. ONE CONNECTED OT SECURITY PROGRAM.

01 OT Cybersecurity Program

How do we establish, govern, manage, and continuously improve an effective OT cybersecurity program?

INCLUDES Maturity and risk, strategy, governance, standards, roadmaps, metrics

OUTCOME **A prioritized, fundable security roadmap**

02 OT Network Architecture & Segmentation

How do we securely architect, segment, and protect our OT networks?

INCLUDES Architecture review, zone and conduit design, technology selection, validation

OUTCOME **Segmented networks that contain threats**

03 OT Visibility, Monitoring & Detection

How do we understand what is in our OT environment, what it is doing, and identify activity or conditions that require attention?

INCLUDES Asset visibility, monitoring architecture, deployment, integration, tuning

OUTCOME **Known assets and early warning of threats**

04 OT Asset, Vulnerability & Lifecycle Management

How do we identify, prioritize, address, and continuously manage vulnerabilities and technology lifecycle risks across our OT environments?

INCLUDES Vulnerabilities, hardening, patching, secure configuration, end-of-life planning

OUTCOME **Risk reduced safely, on your schedule**

05 OT Identity & Secure Access

How do we ensure the right people and systems have the right access to OT resources under the right conditions?

INCLUDES Authentication, authorization, privileged, third-party, and remote access

OUTCOME **Controlled, auditable access to OT systems**

06 OT Incident Response & Resilience

How do we prepare for, respond to, and recover from an OT cybersecurity incident while minimizing operational impact?

INCLUDES Readiness, playbooks, exercises, recovery planning and testing

OUTCOME **Faster, practiced recovery from incidents**
